In documented detail, the author argues that the same interconnecting bloodlines have controlled the planet for thousands of years. Original.

NEW YORK TIMES BESTSELLER • In the final book of his astonishing career, Carl Sagan brilliantly examines the burning questions of our lives, our world, and the universe around us. These luminous, entertaining essays travel both the vastness of the cosmos and the intimacy of the human mind, posing such fascinating questions as how did the universe originate and how will it end, and how can we meld science and compassion to meet the challenges of the coming century? Here, too, is a rare, private glimpse of Sagan ' s thoughts about love, death, and God as he struggled with fatal disease. Ever forward-looking and vibrant with the sparkle of his unquenchable curiosity, Billions & Billions is a testament to one of the great scientific minds of our day. Praise for Billions & Billions " [Sagan ' s] writing brims with optimism, clarity and compassion. " —Ft. Lauderdale Sun-Sentinel " Sagan used the spotlight of his fame to illuminate the abyss into which stupidity, greed, and the lust for power may yet dump us. All of those interests and causes are handsomely represented in Billions & Billions. " —The Washington Post Book World " Astronomer Carl Sagan didn ' t live to see the millennium, but he probably has done more than any other popular scientist to prepare us for its arrival. " —Atlanta Journal & Constitution " Billions & Billions can be interpreted as the Silent Spring for the current generation. . . . Human history includes a number of leaders with great minds who gave us theories about our universe and origins that ran contrary to religious dogma. Galileo determined that the Earth revolved around the Sun, not the other way around. Darwin challenged Creationism with his Evolution of Species. And now, Sagan has given the world its latest challenge: Billions & Billions. " —San Antonio Express-News " [Sagan ' s] inspiration and boundless curiosity live on in the gift of his work. " —Seattle Times & Post-Intelligencer " Couldn ' t stay awake in your high school science classes? This book can help fill in the holes. Acclaimed scientist Carl Sagan combines his logic and knowledge with wit and humor to make a potentially dry subject enjoyable to read. " —The Dallas Morning News

Makow argues that mankind is being deliberately sabotaged by a powerful cult that controls the credit of the nations.

This book presents a comparative analysis of the organizing trajectories of indigenous women ' s movements in Peru, Mexico, and Bolivia. The authors ' innovative research reveals how the articulation of gender and ethnicity is central to shape indigenous women ' s discourses. It explores the political contexts and internal dynamics of indigenous movements, to show that they created different opportunities for women to organize and voice specific demands. This, in turn, led to various forms of organizational autonomy for women involved in indigenous movements. The trajectories vary from the creation of autonomous spaces within mixed-gender organizations to the creation of independent organizations. Another pattern is that of women ' s organizations maintaining an affiliation to a male-dominated mixed-gender organization, or what the authors call " gender parallelism ". This book illustrates how, in the last two decades, indigenous women have challenged various forms of exclusion through different strategies, transforming indigenous movements ' organizations and collective identities.

After a world-famous opera star—and ex-flame—asks him to investigate her brother’s mysterious death, British Air Service officer Ben Hope gets caught up in a centuries-old web of intrigue surrounding the death—and possible murder—of Mozart. Reprint.

Personal story of Preston Nichols and how radar was used to manipulate matter and time itself beginning with the Philadelphia Experiment and was further developed at Montauk. This edition includes the original text plus details over two decades worth of investigation leading to the scientific proof of actual time travel capabilities plus patent.

The well-known astronomer and astrobiologist surveys current knowledge of the development of intelligence on Earth in various forms of life and explains his persuasion that intelligence must have developed along similar lines throughout the universe

The real story behind the Tavistock Institute and its network, from a popular conspiracy expert The Tavistock Institute, in Sussex, England, describes itself as a nonprofit charity that applies social science to contemporary issues and problems. But this book posits that it is the world’s center for mass brainwashing and social engineering activities. It grew from a somewhat crude beginning at Wellington House into a sophisticated organization that was to shape the destiny of the entire planet, and in the process, change the paradigm of modern society. In this eye-opening work, both the Tavistock network and the methods of brainwashing and psychological warfare are uncovered. With connections to U.S. research institutes, think tanks, and the drug industry, the Tavistock has a large reach, and Tavistock Institute attempts to show that the conspiracy is real, who is behind it, what its final long term objectives are, and how we the people can stop them.

Bored with their work, three Milanese editors cook up "the Plan," a hoax that connects the medieval Knights Templar with other occult groups from ancient to modern times. This produces a map indicating the geographical point from which all the powers of the earth can be controlled—a point located in Paris, France, at Foucault ' s Pendulum. But in a fateful turn the joke becomes all too real, and when occult groups, including Satanists, get wind of the Plan, they go so far as to kill one of the editors in their quest to gain control of the earth.Orchestrating these and other diverse characters into his multilayered semiotic adventure, Eco has created a superb cerebral entertainment.
