Introduction To

Diode-Pumped Solid State Lasers ...

A laser diode, (LD), injection laser diode (ILD), or diode laser is a semiconductor device similar to a light-emitting diode in which a diode pumped directly with electrical current can create lasing conditions at the diode's junction.: 3 Laser diodes can directly convert

Acces PDF Introduction To

electrical energy into light. Driven by voltage, the doped p-n-transition allows for recombination of an electron with a hole.

Laser diode - Wikipedia

There has been recent interest in diode pumped metastable rare gas lasers (DPRGLs) and their scaling to higher powers, due to the

Acces PDF
