This resource presents the key accounting concepts that managers must know in order to make informed decisions. The fourth edition includes expanded Incremental Measurement and You Get What You Measure sections in each chapter. These hallmark features help them focus on real issues. New demo problems have been added as well to show how the concepts are applied. The end-of-chapter problems and Links to Practice sections have been revised and updated to connect the techniques to the business world. Case studies also enable managers to gain critical and applied thinking skills that are especially important in today ' s competitive environment.

This book is written for professional managers, both in public and private sectors, who have little or no background in Economics, but have to face, on a regular basis, the challenges posed by a rapidly changing macroeconomic policy environment.The book attempts to provide an understanding of how macroeconomic policies work and, in turn, how they impact the business environment. It adopts a uniquely practical approach to explain various aspects by deliberately avoiding jargon, diagrams and equations. Instead, a story mode has been in-built for easy grasp.

Develop a strong foundation in accounting that prepares you for future study and success in today's business world with Warren/Jonick/Schneider's leading ACCOUNTING, 28E and CengageNOWv2 digital resources. This edition connects accounting concepts to the "bigger picture" as chapter-opening schemas clearly demonstrate how each chapter's content fits within the overall framework of the book. The CengageNOWv2's Journal Entry Tool reinforces this approach by automatically illustrating the impact of transactions on the accounting equation. This book's hallmark presentation of the accounting cycle provides an unmatched foundation for understanding later chapters and future coursework. The authors have carefully streamlined content and improved learning features to ensure you have the understanding of today's accounting and specific tools you need to succeed.

Explores computer-intensive probability and statistics for ecosystem management decision making Simulation is an accessible way to explain probability and stochastic model behavior to beginners. This book introduces probability and statistics to future and practicing ecosystem managers by providing a comprehensive treatment of these two areas. The author presents a self-contained introduction for individuals involved in monitoring, assessing, and managing ecosystems and features intuitive, simulation-based explanations of probabilistic and statistical concepts. Mathematical programming details are provided for estimating ecosystem model parameters with Minimum Distance, a robust and computer-intensive method. The majority of examples illustrate how probability and statistics can be applied to ecosystem management challenges. There are over 50 exercises - making this book suitable for a lecture course in a natural resource and/or wildlife management department, or as the main text in a program of self-study. Key features: Reviews different approaches to wildlife and ecosystem management and inference. Uses simulation as an accessible way to explain probability and stochastic model behavior to beginners. Covers material from basic probability through to hierarchical Bayesian models and spatial/ spatio-temporal statistical inference. Provides detailed instructions for using R, along with complete R programs to recreate the output of the many examples presented. Provides an introduction to Geographic Information Systems (GIS) along with examples from Quantum GIS, a free GIS software package. A companion website featuring all R code and data used throughout the book. Solutions to all exercises are presented along with an online intelligent tutoring system that supports readers who are using the book for self-study.

This third edition prepares entrepreneurs for the rewards and pitfalls of this career choice. It explores a new theme on how to effectively manage a start-up company. Focus on Real Entrepreneurs sections highlight how entrepreneurs position their companies to meet the various marketing, financial, and technological challenges. Management Track sections present key management issues while following the development of a real company. Entrepreneurs will also find real situations and examples on which they can practice the broad range of skills required to start and build a company in today's complex world.

This book is a study of earnings management, aimed at scholars and professionals in accounting, finance, economics, and law. The authors address research questions including: Why are earnings so important that firms feel compelled to manipulate them? What set of circumstances will induce earnings management? How will the interaction among management, boards of directors, investors, employees, suppliers, customers and regulators affect earnings management? How to design empirical research addressing earnings management? What are the limitations and strengths of current empirical models?
